Subject: failure notice

    Hi. This is the qmail-send program at yahoo.com.
    I'm afraid I wasn't able to deliver your message to the following addresses.
    This is a permanent error; I've given up. Sorry it didn't work out.

    <edward@cawthon-hollums.com>:
    76.76.22.149 does not like recipient.
    Remote host said: 550-Callback setup failed while verifying    <pgoodman76@att.net>
    550-Called:    12.102.252.75
    550-Sent:      MAIL FROM:<>
    550-Response: 521-76.76.22.149 blocked by sbc:blacklist.mailrelay.att.net.
    550-521 DNSRBL: Blocked for abuse. See   http://att.net/blocks
    550-The initial connection, or a HELO or MAIL FROM:<> command was
    550-rejected. Refusing MAIL FROM:<> does not help fight spam, disregards
    550-RFC requirements, and stops you from receiving standard bounce
    550-messages. This host does not accept mail from domains whose servers
    550-refuse bounces.
    550 Sender verify failed
    Giving up on 76.76.22.149.
